

GARAGE DOORS

Coachman® Design 13 with REC14 Windows

ACCENT the beauty of YOUR HOME

A guide to choosing a garage door as beautiful as your home

Clopay, the right choice for your home.

- Clopay is North America's largest and most trusted garage door brand
- A garage door can represent as much as 30% of your home's front façade, which makes choosing the right design especially important – and Clopay has the widest selection available
- Clopay garage doors are designed and manufactured in the USA

SPECIAL In-Stock doors not available in every market. Additional fees apply for deliveries greater than 30 drive miles from store location.

NOTES: Please note that Bridgeport™ Steel, Reserve® Wood, Canyon Ridge® and Avante® doors are available ONLY professionally installed.

HOW TO MEASURE YOUR DOOR

1. Measure existing door width and height in feet and inches. This determines the size of door needed. The rough opening should be the same size as the door.

Width: _____

Height: _____

2. Measure for sideroom: 4-1/2" is required on each side for installation of the vertical track for standard extension or torsion springs, or EZ-SET® torsion spring. 5-1/2" is required for EZ-SET® extension spring.

Sideroom: _____

3. Measure area labeled "headroom" – distance between the top of the door opening (jamb header) and the ceiling or lowest obstruction (e.g., opener, beams or light fixtures). 10" is required for standard installation of extension springs and EZ-SET® extension spring; 12" on standard torsion springs and EZ-SET® torsion spring. 14-1/2" of headroom required for carriage house doors. If you have restricted headroom, special hardware is available. Low headroom hardware is available to reduce requirement to as low as 4-1/2" (minimum with standard extension spring or EZ-SET® extension spring). EZ-SET® torsion spring low headroom requirement is 9".

Note: If door height extends above the opening, the headroom measurement should be adjusted accordingly.

Existing headroom: _____

Headroom needed: _____

4. Measure area labeled "backroom" – distance is measured from the garage door opening toward the back wall of the garage.

Backroom: _____

Common garage door sizes include 8' wide × 7' high, 9' wide × 7' high, and 16' wide × 7' high. Clopay manufactures most doors in nearly any size you require.
